

Eilene Eynon WSU Pharmacy 1989, Consultant Pharmacist

Community Practice- Gary Burnstein Health Clinic Pontiac, Mi

I oppose SB 373 for the following reasons;

Current bill proposes that patients will be provided with better pharmacy products or pharmacy services in a more efficient manner. This is the wrong solution. Patients need better pharmacy services, efficiencies accrue to the pharmacy owner not the patient. More Products with less Pharmacy oversight means less safety and more patient confusion.

Bill does not provide limitations with regards to competitive benefits that pilot programs may have, this provides an economic incentive that is unfair to all non-pilot pharmacies.

There is no un-served public market or unmet public need requiring this bill.

There is no specific benefit committed to the public from this bill.

The market place along with the Board of Pharmacy have created significant enhancements to the public since the advent of the computer, what will this bill do that improves upon this?

If pilot project do compromise public health and safety who will be the appropriate party to compensate for this compromise?

YOU CAN'T LEGISLATE INNOVATION, SO WHAT IS THE TRUE PURPOSE OF THIS BILL?

WHAT PUBLIC HEALTH NEED DOES THIS BILL CORRECT? HOW?

IF EXCEPTIONS TO PHARMACY RULES ARE NEEDED, WHY AREN'T PHARMACISTS ASKING TO HAVE SPECIFIC RULES CHANGED?
